

Activities, in Step With the Seasons

Whether it is for a red class (fall), a white class (winter) or a green class (spring), the typical schedule for a day in a nature class is much the same. However, during rainy days and winter camps, activities and their duration may change. Ask the camp for its alternative programming in case of rain or extreme cold.

In nature classes, the animator/children ratio is usually 1 to 15. However, the P'tit Bonheur camp increases this ratio according to the activity or the age of the students and offers support supervision formulas when you participate in the activities. Ask the camp about the various possible supervision arrangements according to your needs and objectives.

RED CLASS (September/October)	WHITE CLASS (January/February/March)	GREEN CLASS (May/June)
Canoe/Kayak/Rabaska	Skating (bring your skates)	Canoe/Kayak/Rabaska
